

**POWER DOOR CONTROL AND SENSOR MODULE
FOR A WIRELESS SYSTEM**

Abstract of the Disclosure

5 A module with a sensor to indicate the position of a door coupled to a door
opener. The module is compatible with a wireless communication protocol and
operates over both a long range, such as is used with a cellular telephone, and a short
range, such as is used with BLUETOOTH®. A door position sensor coupled to the
module provides information to the user over a wireless communication channel. In one
10 embodiment, information from an additional door position sensor is wirelessly
transmitted. In one embodiment, an audio transducer coupled to the module responds to
voice commands to operate the door opener.
